Blended Learning Edition

Per-Project Lesson Plans with Step Inserts, Teaching Notes & Pacing
Guides

Preface

Welcome to the **Origins 2.2** Teacher's Manual. This manual provides detailed lesson plans for all 14 lessons in this workbook level.

Each lesson is organized into **4 class periods** (approximately 40 minutes each), covering the 13-step workbook sequence:

Period 1: Launch & Vocabulary (Steps 1-4)

Period 2: Deep Reading & Comprehension (Steps 5-7)

Period 3: Response & Practice (Steps 8-10)

Period 4: Writing & Reflection (Steps 11-13)

How to Use This Manual

- **Step Inserts:** Each period includes a reduced-size "Student View" showing exactly what students see in their workbook. Use these to stay synchronized with the printed page.
- **Teaching Notes:** For each step, you'll find Teacher Actions, Teacher Language (scripted prompts), What Students Do, and Watch For sections.
- **Bell-Ringers:** Each period starts with a 5-minute flashcard activity to build vocabulary recall.
- **Online Components:** Notes about app-based activities (QR reading, AI writing feedback, progress tracking) are integrated into each period.

Blended Learning Model

This workbook uses a blended learning approach combining the printed workbook with the Reading Advantage app:

- The **workbook is the lesson path** — follow it page by page.
- The **app supports the workbook** — use QR codes for audio, AI for writing feedback, and the progress tracker for motivation.
- The **teacher anchors instruction** — model tasks, use the scripted language, and mediate all AI interactions.

General Lesson Plan Structure

Each of the 14 lessons in this workbook follows the same 4-period, 13-step structure. This consistency helps students know exactly what to expect each class.

Period 1: Launch & Vocabulary (Steps 1-4)

- **Step 1: Before You Read** — Students preview the topic, mark interest level
- **Step 2: Key Vocabulary** — Teacher introduces words, students write meanings

- **Step 4: Collect Vocabulary** — Students transfer key words to workbook boxes

 Bell-Ringer: Flashcard cut-out and organization (5 min)

 Online: App article reading (QR/audio support)

Period 2: Deep Reading & Comprehension (Steps 5-7)

Pedagogical Guidelines

Pair Work Protocols

- Assign pairs at the start of the semester and keep them stable for 4-6 weeks.
- Use pair work for: comprehension discussion (Step 7), sentence sharing (Step 6), and flashcard games.
- Set a clear signal for returning attention to the teacher (e.g., "Eyes on me in 3-2-1").
- Walk around during pair work to listen for misconceptions.

Class Discussion Techniques

- **Think-Pair-Share:** Give students 30 seconds to think, 1 minute with a partner, then share with the class.
- **Evidence First:** Always ask "Which part of the article helps you?" before accepting answers.
- **Cold Call with Warm-Up:** Let students discuss with a partner before calling on individuals.
- **No Wrong Interest:** When marking interest stars, reinforce that all responses are valid.

Using the App for Audio/QR Support

- Each article has a QR code linking to audio narration in the app.
- Use app audio for: first reading (Step 3), vocabulary pronunciation (Step 2), and homework review.
- Ensure QR codes are tested before class — have a backup plan if the app is unavailable.
- For schools without devices: the teacher can play audio from their phone through speakers.

Managing the Blended Learning Flow

- The workbook is the anchor. The app supports. Do not replace workbook time with screen time.
- App-based activities (extensive reading, AI writing feedback) are typically assigned as homework.
- In class, use the app only for: audio playback, QR demonstration, and progress tracker updates.
- When students receive AI writing feedback at home, discuss it as a class in Period 4 of the next lesson.

Flashcard Vocabulary Games

Vocabulary flashcards are included at the end of the student workbook. Each lesson has a set of cards with words on one side and definitions on the other.

Period 1: Cut-Out & Organization

Students cut out the cards for the current lesson and fold them along the center line. Have students organize cards by topic or alphabetically.

Periods 2-4: Vocabulary Games

Use one of these games as a 5-minute bell-ringer at the start of each period. Rotate through different games to keep engagement high.

Memory Match

Spread cards face-down. Students flip two at a time, trying to match words with their definitions. If they match, the student keeps the pair. Most pairs wins.

Go Fish

Distribute 4-5 cards per student. Students ask partners: "Do you have the definition of ____?" If the partner has it, they hand it over. If not, they say "Go fish!" Collect the most pairs to win.

Snap

Teacher reads definitions aloud one at a time. Students race to slap the matching word card on their desk. First to slap correctly keeps the card.

Quiz Show

Teacher gives definitions. Students hold up the correct word card. Fastest correct answer wins a point. Use for whole-class review.

Spelling Routine Guide

Spelling practice appears in the workbook for lessons 2, 3, and 4 of each week. The spelling section uses a three-period cycle that builds from tracing to independent writing.

Period 2: Trace

Students trace the vocabulary words using the light gray letters in the spelling practice section. Focus on correct letter formation and spacing. This is guided practice.

Period 3: Write

Students write the vocabulary words from memory in the "Write" column. They should look at the model word, cover it, then write. Check letter formation and accuracy.

Period 4: Cover-and-Write

Students cover the word model completely, then write the word from memory in the "Cover & Write" column. Uncover to check accuracy. This is the final assessment step.

Note: Spelling practice appears in lessons 2, 3, and 4 of each week. Lesson 1 introduces new vocabulary but does not include spelling practice.

My English Learning Goals

At the beginning of each semester, introduce the "My English Learning Goals" page included at the front of the student workbook.

How to Introduce Goal Setting

1. **Explain the purpose:** "This page helps you think about what you want to learn this semester."
2. **Model a goal:** Write an example goal on the board (e.g., "I want to read 14 articles this semester").
3. **Guide goal writing:** Have students write 2-3 specific, achievable goals.
4. **Action plans:** Help students write one action step for each goal.
5. **Revisit:** At mid-semester, have students check their progress and adjust goals if needed.

Goal Categories

- **Reading:** "I want to read ____ articles independently."
- **Writing:** "I want to write ____ sentences without help."
- **Vocabulary:** "I want to learn ____ new words this semester."

Self-Assessment Administration Guide

The "My Learning Reflection" page at the end of the workbook helps students evaluate their own progress. Here's how to administer it effectively:

Before Administering

- Allow 10-15 minutes of quiet time for completion.
- Remind students this is about honest self-reflection, not a test.
- Have students review their completed workbook pages before starting.

During the Reflection

- Students rate themselves on reading, writing, and vocabulary skills.
- Students identify their strongest area and areas for improvement.
- Students set goals for the next workbook/semester.

After Completion

- Collect or have students keep their reflections as a portfolio piece.
- Use results to inform differentiated support in the next unit.
- Share common strengths with the class to build confidence.

Tip: Do not grade the self-assessment. Its value is in the reflection process, not the score.

Certificate Ceremony Guide

The certificate of completion at the end of the workbook is a meaningful milestone for students. Here's how to present it effectively:

Presentation Tips

- **Make it special:** Set aside 10 minutes at the end of the final lesson for the ceremony.
- **Personalize:** Fill in the student's name before the ceremony.
- **Sign it:** Sign each certificate personally — students value a teacher's signature.
- **Acknowledge effort:** Briefly mention each student's specific achievement or improvement.
- **Photo opportunity:** Allow students to take a photo with their certificate.

What to Say

- "You completed all 14 lessons. That takes dedication."
- "Look at how much vocabulary you learned."
- "Your writing has improved since Lesson 1."
- "I'm proud of your effort this semester."

Tip: For younger students, consider inviting another teacher or the principal to hand out certificates for extra impact.

Troubleshooting

Student Pacing Issues

Problem: Some students finish much faster than others.

Solution:

- Early finishers can: re-read the article, help a partner, review flashcards, or start the spelling practice.
- For slower students: reduce the number of vocabulary collection boxes required (e.g., 2 instead of 4).
- Never skip steps — shorten them instead.

App/QR Code Issues

Problem: QR code doesn't work or students don't have devices.

Solution:

- Test all QR codes before class.
- Play audio from the teacher's phone through classroom speakers as a backup.
- If devices are unavailable, the teacher reads the article aloud and skips app-based homework.
- Assign extensive reading as optional homework for students with app access.

Writing Step Too Difficult

Problem: Students struggle with Step 11 (Guided Writing).

Solution:

- Model the planner on the board before students begin.
- Provide additional sentence frames if needed.
- Allow students to write 3-4 sentences instead of a full paragraph.
- Pair stronger and weaker writers for peer support.

Low Engagement During Flashcard Games

Problem: Students lose interest in flashcard games.

Solution:

- Rotate through different games (Memory, Go Fish, Snap, Quiz Show).
- Add a small reward for the winning pair (e.g., choosing the next game).
- Limit game time to 5 minutes — short and energetic.
- If a class dislikes card games, use the flashcards for a quick oral quiz instead.

AI Writing Feedback Confusion

Problem: Students don't understand the AI feedback they received at home.

Solution:

- In Period 4, project one student's feedback (with permission) and discuss it as a class.
- Teach students to focus on 1-2 pieces of feedback, not everything at once.
- Remind students: AI feedback is a suggestion, not a grade.
- The teacher always has the final say on writing quality.
